

Bioinformatician

Location: Suresnes (92), France & remote

Contract Type: Full-time

Start Date: ASAP

Who We Are

At **Phagos**, we are on a mission to create a cleaner, more sustainable future. By harnessing the power of bacteria's natural predator—the **bacteriophage**—we aim to tackle antibiotic resistance and revolutionize the fight against infectious diseases in animal farming.

To achieve this ambitious goal, we are looking for a motivated **bioinformatician** to join our dynamic team. Your work will be instrumental in processing, analyzing, and reporting data that drives key decisions for our wet lab team. If you're ready to play a critical role in our journey and make an impact, we'd love to hear from you!

Your Responsibilities

- Launch and monitor **automated bioinformatics pipelines**.
- Analyze pipeline outputs and write comprehensive, **clear reports** tailored for the wet lab team.
- Provide actionable feedback to improve workflows, ensuring robust data interpretations.

Your Technical Skills

Required:

- **From a Bachelor's degree** (depending on experience) in Bioinformatics or a related field.
- Experience with genomic assembly and processing with Nanopore/Illumina
- Proficiency in BASH and Bioinformatic softwares for NGS analysis
- Professional working proficiency in **English** (writing and speaking).

Nice-to-Have (in order of priority):

- Prior experience in **bacterial and phage genomics**
- Able to present results with proper visualization
- Familiarity with **pipeline automation tools** like Nextflow and Docker.

Why Join Us?

Phagos offers a unique opportunity to contribute to meaningful, high-impact work in bacterial and phage genomics. You'll work alongside a passionate, collaborative team in a **hybrid environment** that combines the best of in-office innovation and remote flexibility.

How to Apply

If this role excites you, we'd love to connect! Submit your application [here](#) — we can't wait to hear from you.
